EDUCATION

Wellesley College - Wellesley, MA

Expected May 2026

B.A Computer Science and Economics - GPA: 3.75

Relevant Coursework: Artificial Intelligence, Data Structures in Java, Fundamental Algorithms, Theory of Computation, Introduction to Probability and Statistics, Combinatorics and Graph Theory, Data for Humans

Massachusetts Institute of Technology - Boston, MA

2022 - 2024

Cross Registered Student - GPA: 4.00

Relevant Coursework: Software Design, The Law of A.I, Big Data and Social Media

TECHNICAL SKILLS

Languages - Python, Javascript, jQuery, Node.js, Typescript, Java, HTML, CSS, Matplotlib, Pandas, R, d3.js

Frameworks/Tools - Bootstrap, Vue, MongoDB, VSCode, Figma, Github, Git, Microsoft Office

Skills - Software Development Life Cycle, Front-End Development, Product Design, Data Analysis, Project Management

WORK EXPERIENCE

Live Nation

Finance Technology Intern

June 2024 - August 2024

- Led efforts to successfully transition over 1000+ employees from Oracle EBS to Oracle Cloud Fusion system
- Improved project visibility by delivering daily reports with Microsoft Excel, facilitating effective issue resolution across 12 groups
- Ensured seamless user access during go-live through cross-functional collaboration with sales and business teams
- Refined team understanding of organization structure by developing detailed visual org hierarchy in LucidChart

Wellesley Computer Science Department

August 2023 - June 2024

Teaching Assistant

- Tutored over 50 students in the introductory data structure course; led weekly 1:1 drop-in hours with students, debugging code, and clarifying concepts about data structures like Heaps, Linked Lists, Trees, and Hash Maps
- Refined student's problem solving abilities by translating technical code processes to non-technical explanations
- Strengthened student practices in documentation, code clarity, and testing by grading 150+ coding assignments

Wellesley Hackathon

May 2023 - October 2023

Web Developer

- Co-lead development of official hackathon website from using JS/HTML/CSS and Bootstrap to effectively present information to 100+ hackathon participants
- Translated product designs into a final deliverable by pair programming a one-page web structure
- Improved front-end development and Bootstrap knowledge through bi-weekly feedback sessions with co-lead
- Enhanced collaboration with co-lead by sending high quality pull requests with Git during code reviews

PROJECTS

Personal Website

- Designed and developed a personal website with HTML/CSS/jQuery/Bootstrap to more effectively present my projects, interests, and aspirations
- Created a full, high-fidelity prototype in Figma, designing icons, logos, and buttons from scratch
- Utilized the Web Development Life Cycle and fully redesigned the website into a mobile-friendly build after thorough testing for obstacles in UX
- Self-studied jQuery and responsive design principles to utilize cleaner, effective, flexible code in the final product
